

Jomar Dela Cruz Maestro

Calauan, Laguna • maestrojomar143@gmail.com • 0968-325-4602 • github.com/Nethaiah • nethaiah.online • linkedin.com/in/maestro-jomar

Professional Summary

Detail-oriented Full-Stack Developer with a strong foundation in software engineering and AI technologies. Experienced in building secure, scalable applications using Next.js and PostgreSQL, with hands-on expertise across various frameworks and tools. Proven ability to deliver production-ready solutions that solve real-world problems and streamline operations.

Relevant Experience

Laguna Management Information Systems Office (MISO) | IT Intern

Feb 2026 – April 2026

STARS (Student Test Analysis and Record System)

Santa Cruz, Laguna

- Accelerated real-time OMR auto-capture speeds, by engineering an optimized OpenCV pipeline that bypasses expensive NV21-to-Bitmap frame conversions.
- Achieved at least 94%+ bubble detection accuracy across 30–60 item exam formats by calculating pixel density and applying solidity, darkness, and fill ratio filters to reject false positives.
- Delivered a production-ready APK to Calangay Integrated High School teachers, earning a Certificate of Recognition for successful field deployment.

Ship or Be Shipped Hackathon

Dec 2025

MedAssist (AI-Powered Treatment Plan Assistant)

Makati City, Metro Manila

- Engineered a real-time safety validation layer using the OpenFDA API to cross-reference AI outputs against federal drug databases, automatically flagging contraindications and ensuring clinical compliance.
- Developed an AI-powered treatment planner during a 24-hour coding sprint, parsing patient intake data into structured JSON recommendations via LLM.

Freelance Full-Stack Developer

July 2025 – Aug 2025

RPTAS Project (Real Property Tax Assessment System)

Santa Cruz, Laguna

- Architected a secure role-based authentication system using Next.js and PostgreSQL for administrators, assessors, and taxpayers.
- Implemented schema-based validation with Zod, protecting critical tax assessment records from invalid submissions.

Projects

Doculens | AI-Semantic Theses Search & Document Management Platform

Oct 2025 – May 2026

Next.js, FastAPI, Supabase, PgVector, Gemini 2.5 Flash, BM25, Sentence Transformers

- Engineered an AI search system, achieving 92% top-result accuracy, by combining keyword matching with meaning-based semantic algorithms.
- Enhanced AI document summarization, attaining a 94% semantic accuracy score, by building a custom filtering system to feed the AI only highly relevant context.
- Optimized application performance, decreasing load times by approximately 150-200 ms by implementing Next.js cache components for server-rendered UI and data fetching.

Education

Laguna University

Aug 2021 - June 2026

Bachelor of Science in Computer Science with specialization in Data Science

Santa Cruz, Laguna

- **Relevant Coursework:** Software Engineering, Artificial Intelligence, Information Management, Machine Learning, Database Management System

Certifications and Awards

- **Certificates:** AWS Cloud Practitioner (DataCamp), IBM Software Engineering (Coursera), IBM Cloud Computing (Coursera)
- **Awards:** Certificate of Recognition for successful field deployment, Best Thesis (CCS), Best Research Presenter (Institutional)

Technical Skills

TypeScript, JavaScript, Python, PHP, SQL, React, Next.js, Tailwind CSS, Node.js, FastAPI, Laravel, PostgreSQL, Supabase, Neon, Drizzle ORM, Git/GitHub, Vercel, Google Cloud Platform, Hosting, Railway.
